VEHICLE LIVERIES BEFORE AND AFTER CARE

Before we fit your vehicle:

- Wash your vehicle
- DON'T wash your vehicle with any wax based products
- Make sure you are able to leave your vehicle with us for a full working day
- Please drop your vehicle off the night before, or on the morning of the fitting date at 9am
- As we are a small business, fitting on-site at Williams Design and Print is required and is also weather dependent - it can not be fitted in high winds or rain
- Fitting can only happen over 8 degrees, if under, the graphics will not adhere properly
- Farm equipment and machinery can be fitted off-site
- If you require us to come out and fit your graphics please ask when quoted
- If your vehicle has recently been spray painted, please allow at least 2 weeks before vinyl application can be done

After Care:

- Allow a few days for adhesion of vinyls before washing
- Do not jet wash your vehicle, this will result in the vinyl graphics peeling
- Hand wash vehicles if possible
- Avoid scrubbing delicate/small text/images
- We will always endeavor to rectify any issues that may occur but we can not be held responsible if the above care has not been taken with your vehicle vinyls

• Small & Large Vans • Pick-ups • Cars • Coaches • Tractors • Trailers • Farm Equipment
